RECOGNITION OF BUILDINGS RIGHT, BUT QUICK ACTION IS NEEDED
Eurima comments on the Energy Council Conclusions on the Commission’s
Green Paper on Energy Efficiency

Brussels – 1 December 2005

Commenting on the release of the Green Paper on Energy Efficiency Horst Biedermann, Director General of Eurima, said:

“Simple measures such as insulation could cut Europe's energy bill by 20%, whilst at the same time, saving the EU 14.5 billion EURO a year by 2015. The Council's call for more measures to support energy savings in buildings, should therefore be a signal to the Commission to adopt improved rules for buildings, such as renovation in the residential building stock, as soon as possible.”

Company information

EURIMA is the European Association of Insulation Manufacturers and represents the interests of all major mineral wool insulation producers throughout Europe. EURIMA members employ over 20,000 people across Europe with the installation of insulation products accounting for an estimated 300,000 man-years.

EURIMA members manufacture mineral wool insulation products. These products are used in residential and commercial buildings as well as industrial facilities. Glass and stone wool insulation secure a high level of comfort, low energy costs and minimised CO2 emissions. Mineral wool insulation prevents heat loss through roofs, walls, floors, pipes and boilers, reduces noise pollution and protects homes and industrial facilities from the risk of fire.
